www.HotWaterProducts.com

Our commitment to the industry is second to none.

Hot Water Products began in 1998 with a focus on retrofit water heaters, establishing itself as an industry leader from day one. But we've since diversified. Today, our business houses five divisions—Hot Water Products, Boiler Buddy, Badgerland Tanks, Solar Thermal, and Optimal Lighting Solutions—together offering a holistic approach to renewable energy and high efficiency.

Hot Water Products, Inc. is one of the largest stocking distributors of solar thermal, domestic hot water, and hydronic heating systems, parts, and accessories in the Midwest.

An industry leader in distribution of high efficiency and renewable energy water heating and hydronic heating equipment.

Huge inventory • Training • Design Assistance • Troubleshooting • 24/7 Service • Financial Incentives & Rebate Assistance • Boiler Room Delivery & Removal • Leasing • Two Locations to Serve You

High Efficiency Water & Hydronic Heating

From HTP high efficiency water, hydronic, and combination heating appliances to Bradford White water heaters, PVI boilers, and many others—we have the right solution available when you need it.

Solar Thermal Systems

Solar Hot Water and Space Heating Technology is here to stay! In the U.S. thousands of solar thermal systems are installed every year. With federal incentives available it's never been a better time to go solar!

Badgerland Large Volume Tanks

Hot Water Products is proud to offer a full line of Badgerland ASME glass-lined, large volume storage tanks. Fully customizable, from 175 to 5,000+ gallons.

Boiler Buddy Buffer Tanks

The Boiler Buddy tank is a factory insulated and jacketed storage tank which adds mass to hydronic heating systems, providing the necessary buffer to prevent short cycling. Available in 30, 50, 80 or 119 gallons.

Never before has it been so important to get it right.

We will help you succeed in your business, delivering unparalleled service in:

Product selection. We are especially qualified to evaluate products due to our extensive knowledge of the factory methods used by manufactures in the industry as well as listening closely to customer feedback.

Delivery. You can choose to utilize one of our fleet of delivery trucks or we will work with you to determine the most cost effective freight service. In certain circumstances we even coordinate roof-top delivery for solar collectors. Call for details.

Incentives. Due to the frequent fluctuation in State and Federal Energy Incentives you will appreciate our comprehensive and timely expertise. We will even assist you in completing the paperwork.

Service. We understand the importance of your time and are often available evenings and weekends for on-the-spot consultations.

Training. We have trained, or coordinated the training, of hundreds of plumbing, heating, and mechanical contractors statewide.

We offer a team approach in order to help you meet the highest levels of integrity in the field and meet the stringent demands of commercial, institutional, and government sectors.
